06/2022 – 07/2022
Hyderabad

Verzeo | Software Developer Intern

- Participated in an internship program focused on developing web applications using the Spring Boot framework and MySQL database.
- Utilized Spring Boot features such as dependency injection, auto-configuration, Spring Data JPA, Spring Security for authentication and authorization, and Spring MVC to build scalable and secure RESTful APIs and web applications.

Projects

07/2023 – 03/2024

Fashion Commerce Platform

- Comprehensive e-commerce platform for fashion retail featuring product catalog, shopping cart functionality, user authentication, and secure payment integration. Implemented responsive design with modern UI/UX principles, ensuring optimal user experience across all devices. Built with React and Tailwind CSS for performance and scalability, deployed on Vercel for seamless global access.

09/2022 – 06/2023

AUTOMATIC DETECTION OF GENETIC DISEASES IN PEDIATRIC AGE USING PUPILLOMETRY, Major Project

- Diagnosing inherited retinal diseases, such as Retinitis Pigmentosa, in pediatric patients is challenging due to the wide range of clinical and genetic causes. These diseases, classified as outer and inner retina diseases, often lead to severe visual deficits and childhood blindness.
- A Clinical Decision Support System (CDSS) was designed, employing two distinct Support Vector Machines (SVMs), one for each eye, to process extracted from pupillometric data. The dual-SVM CDSS has been successfully used to diagnose Retinitis Pigmentosa in pupillometric data

10/2025 – 11/2025

Solo Leveling Workout System

- AI-powered fitness revolution platform that transforms your workout journey into an epic adventure. Features personalized workout plans powered by GPT-5, goal-oriented training programs (weight loss, muscle gain, mobility), and an engaging Solo Leveling-inspired ranking system that tracks progress from E-rank to S-rank hunter. Includes equipment-flexible workouts, health-first approach with medical history considerations, detailed exercise instructions, and comprehensive 7-day progressive plans with warmup, workout, and cooldown routines. Built with modern web technologies and deployed on Vercel.
